

NASSTECH

A Tradition of Technological Excellence

An overview

As part of Bahrain's premier industrial and commercial conglomerate, NassTech is a leading developer of turnkey electromechanical solutions, established to support the advancement of the electricity, water supply and oil industries, and deliver a greater variety of value-added benefits to its customers.

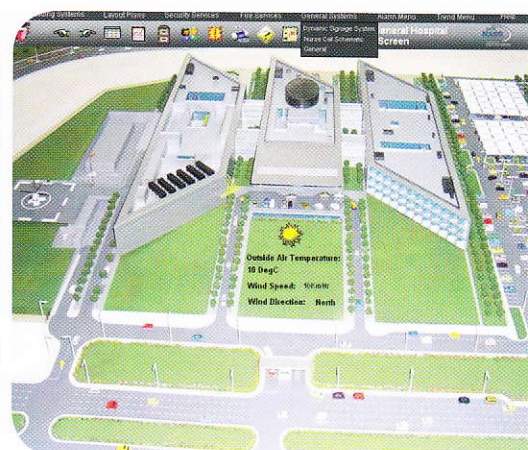

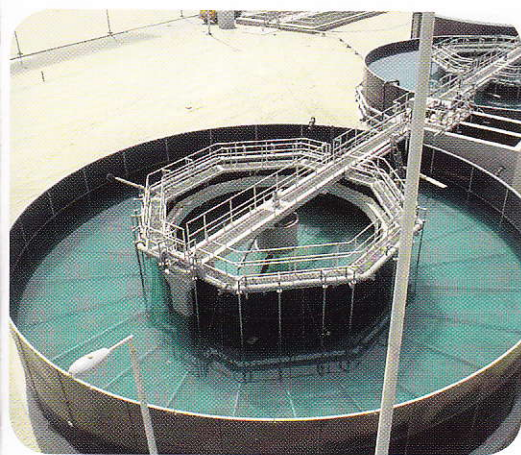

In constantly looking out for innovative products and systems to strengthen the scope of services, we are currently affiliated with reputable manufacturers and technology providers world-wide that are leaders in their fields. Our success uniquely allow us to pass on the benefit of these synergies to our clients.

Our mission

NassTech caters to the pressing needs and increasing demand for power quality services as well as for the development of a specific approach to turn-key solutions. We strive to complement the core electro-mechanical contracting activities crucial to the development of infrastructure and industry in the GCC Market.

The mission of NassTech is to provide the most comprehensive range of services from conceptual design to execution in the fields of:

- Industrial (Electricity, Environmental, Oil & Gas) and Commercial Turnkey Electromechanical Construction services.
- Conceptual Design, Hardware and Software Engineering of Variable Speed drives systems, Soft Starters, ICA Systems including SCADA and BMS.
- Power quality & Energy Management services and solutions.

Our approach: unique and comprehensive

Our approach to providing turn-key solutions covers a broad range of services to ensure end-to-end project success. Our proven expertise at the concept and design phase of a project is unrivalled, as is our commitment to applying advanced engineering and execution methods to finalise and deliver projects efficiently.

A successful history

NassTech commitment to innovation and partnering with clients has resulted in numerous pioneering achievements in various industry sectors, such as significant energy savings in power distribution systems, execution of turn key electromechanical projects for variety of commercial and industrial applications, and successful implementation for automatic meter reading in the utilities sector with broadly developed clientele list including but not limited to: BAPCO-Bahrain, Bahrain Ministry Of Electricity & Water, Qatar Public Works Authority ASHGHAL, Bahrain Ministry of Works, Qatar Petroleum and Qatar General Electricity & Water Corporation KAHRAMAA.
